

# Data Feed Services

Your Reliable Source of  
Real-Time Market Information

The Euronext Athens Data Feed service provides comprehensive real-time information of all orders and trades executed on markets operating on Euronext Athens trading platform.

The service is designed for Trading Members, Data Vendors, and Financial Institutions to help them meet their own needs and the needs of their clients.

## Market coverage

- Euronext Athens Securities and Derivatives Markets
- CSE Securities Markets
- Hellenic Energy Exchange Derivatives Market
- APA@ATHEX Service

## Quality features

Proven reliability and availability of service, spanning over three decades, coupled with cost efficient implementation

Service meets the needs of all market participants, ranging from private investors to sophisticated market professionals

Information provided adheres to all European standards and international protocols

New, low latency technical environment ensures very high-speed transmission of market information, suitable for algorithmic and HFT applications

Access points in Athens and London, as well as our network of international Data Vendors, offer global access to our information service
