

## Saint John's Cooperative Credit Union selects Core Banking solution by Profile Software

**Athens, 21 May 2026:** [Profile \(ATHEX: PROF\)](#), an international technology group, announces that Saint John's Cooperative Credit Union (SJCCU) has selected [Finuevo Core](#) as its new core banking platform. The synergy supports the Credit Union's strategic goals to enhance operational efficiency, strengthen lending capabilities, and deliver an improved customer experience to its members.

With more than 40 years of experience, SJCCU is a premier financial institution in Antigua & Barbuda, offering a wide range of savings, lending, and business services to its members.

Profile's Core Banking solution will equip SJCCU with a single, integrated core banking environment to efficiently support end-to-end member lifecycle management, accounts management, card operations, lending, payments, teller operations and financial reporting - delivering automation, transparency, and scalability across the organisation.

Especially in credit operations, Finuevo Core will modernise and optimise credit origination and loan management through automated workflows, enhanced credit assessment and approval processes, collateral and credit line management, collections and recovery functions, as well as real-time monitoring and performance analytics. The new platform will also streamline the launch of new products through its powerful product factory capabilities

Built on a modular, componentized and API-enabled architecture, Finuevo Core allows SJCCU to streamline processes, reduce manual workload, and integrate securely with external systems—supporting future digital initiatives while ensuring compliance with regulatory and governance requirements.

Peta-Gay Rodney, General Manager at SJCCU commented: "The selection of Finuevo Core marks an important milestone in our digital transformation journey. The solution supports our commitment to operational excellence, prudent lending, and high-quality member service. We are confident that Profile's technology and expertise will enable us to strengthen our core operations and support the long-term growth of our Credit Union."

Evangelos Angelides, Chief Executive Officer at Profile, stated: "We are pleased to partner with Saint John's Cooperative Credit Union and support its transformation with Finuevo Core. Our solution fully addresses the specific needs of cooperative and retail financial institutions, combining robust core banking functionality with flexibility, security, and scalability. This project builds on other significant initiatives we are delivering across the Caribbean and further reinforces our growing footprint in the region."

Profile remains committed to delivering future-ready banking platforms that empower financial institutions worldwide to operate efficiently and serve their clients with confidence and safety.
