“Despite a challenging environment, Eurobank continues its sustained solid performance and organic growth. During the first quarter of 2026, credit expansion was strong across all our core markets, with organic loan growth totaling €1.1bn and the loan book growing by 10% year-on-year. In Greece, corporate loans experienced significant growth, due to increased investments, while mortgages are gradually recovering. Wealth management delivered sound results, achieving a 26% year-on-year increase in managed funds. Earnings per share reached €9 cents, with the non-Greek operations contributing around half of the Group’s profits.

Eurobank delivered the above results while the global economy continues to be affected by the developments in the Gulf region. Though it is currently hard to accurately quantify, there is a broad expectation that growth prospects, both globally and in the region, will take a hit, with GDP estimates already revised downwards. However, all our core markets are expected to continue outperforming the eurozone growth rate.

For Greece and Cyprus in particular, entering this international crisis from a solid fiscal footing is a major advantage which should be safeguarded by remaining anchored to a prudent fiscal policy, while providing the necessary relief measures to vulnerable households and businesses.

Overall, the first quarter demonstrated robust top line performance and reaffirmed our ability to sustain organic growth. As such, without underestimating the volatile geopolitical environment and its adverse impact on economic growth, we are on track to deliver our 2026 plan.”
